Table of Contents

1. Gear Teeth	5	3. Rack Teeth	37
Clocks and Ships	5	Evolutes and Involutes	37
Introduction	6	Rack Teeth	38
Constant Angular Velocity	6	Mesh	40
Involute Curve	9	Rack Tooth	40
Contact Ratio	15	Rack and Pinion	40
Summary	17	Center Distance and Rack Backlash	41
2. Gear Properties	19	Measuring Backlash	44
Clocks and Stars	19	Summary	47
Gear Diameters	19	4. Curves	49
Pitch Circles	22	Degrees and Radians	50
Reference Pitch Circle	22	Involute Function	52
Gear Description	22	Tangent	53
Reference and Operating Properties	22	Reverse Involute Functions	55
Reference DP and PA	23	Using Involute Functions	58
Base Circle	27	Arc Thickness	60
Two Spools	29	Tooth Thickness Approximation	60
Centers	31	Tooth Thickness	61
Line of Action	32	Summary	65
Base Circle Diameter	32	5. Involute Teeth	67
Summary	35	René Descartes	67
		Cartesian Coordinates	67
		Backlash	68
		Backlash Between Two Gears	68
		Center Distance	69
		Zero Backlash	73
		Reduced Backlash	75
		How to Draw Involute Gear Teeth	77
		Summary	83

6. Tooth Generation	85	9. Span Measurements	125
Florence Nightengale	85	Royal Greenwich Observatory	125
Gear Shaping	85	Span Measurement	126
Gear Hobbing	86	Tooth Thickness Calculation	131
Mesh	89	Helical Gears	134
Generating Teeth	89	Span Measurement: Helical Gears	138
Cutter Pitch	90	Summary	143
Summary	91	Abbreviations	145
7. Teeth	93	Index	147
Vernier Calipers	93	References	153
Pierre Vernier	93		
Long and Short Addendum Teeth	93		
Long Addendum Teeth	94		
Short Addendum Teeth	98		
Line of Contact	99		
Operating Diameters	101		
X Dimensions	103		
X Modified Teeth	103		
Stub Teeth	106		
Summary	106		
8. Measurement	109		
Track and Field	109		
Measuring Gear Teeth	109		
Measuring Thickness of Rack Teeth	110		
Measuring Gear Teeth Over Pins	113		
Blank Form, Measure over Pins	123		
Summary	124
