Table of Contents

1. Gear Teeth	5		
Clocks and Ships	5		
Introduction	6		
Constant Angular Velocity	6		
Involute Curve	9		
Contact Ratio	16		
Summary	18		
2. Gear Properties	21		
Clocks and Stars	21		
Gear Diameters	21		
Pitch Circles	24		
Reference Pitch Circle	24		
Gear Description	24		
Reference and Operating Properties	24		
Reference DP and PA	25		
Base Circle	30		
Two Spools	33		
Centers	34		
Line of Action	35		
Base Circle Diameter	36		
Summary	40		
3. Rack Teeth	43		
Evolutes and Involutives	43		
Rack Teeth	44		
Mesh	46		
Rack Tooth	46		
Rack and Pinion	46		
Center Distance and Backlash	47		
		Measuring Backlash	51
		Summary	54
		4. Curves	55
		Degrees and Radians	56
		Involute Function	59
		Tangent	59
		Reverse Involute Functions	61
		Using Involute Functions	64
		Arc Thickness	66
		Tooth Thickness Approximation	67
		Tooth Thickness	68
		Summary	75
		5. Involute Teeth	77
		René Descartes	77
		Cartesian Coordinates	77
		Backlash	78
		Backlash Between Two Gears	78
		Center Distance	79
		Zero Backlash	85
		Reduced Backlash	88
		How to Draw Involute Gear Teeth	90
		Summary	96

6. Tooth Generation	97	9. Span Measurements	151
Florence Nightengale	97	Royal Greenwich Observatory	151
Gear Shaping	97	Span Measurement	152
Gear Hobbing	98	Tooth Thickness Calculation	158
Mesh	101	Helical Gears	163
Generating Teeth	101	Span Measurement: Helical Gears	168
Cutter Pitch	102	Summary	174
Summary	103	Abbreviations	175
7. Teeth	105	Index	177
Vernier Calipers	105	References	183
Pierre Vernier	105		
Long and Short Addendum Teeth	105		
Long Addendum Teeth	106		
Short Addendum Teeth	110		
Line of Contact	111		
Operating Diameters	113		
X Dimensions	115		
X Modified Teeth	115		
Stub Teeth	123		
Summary	123		
8. Measurement	125		
Track and Field	125		
Measuring Gear Teeth	125		
Measuring Thickness of Rack Teeth	126		
Measuring Gear Teeth Over Pins	130		
Blank Form, Measure over Pins	148		
Summary	149
